GROUPS URGE GOVERNOR-ELECT CUOMO TO USE EXECUTIVE POWERS TO ADVANCE CONSUMER, ENVIRONMENTAL, HEALTH, HIGHER EDUCATION AND REFORM ISSUES

REPORT IDENTIFIES 30 MEASURES FOR NEW GOVERNOR'S FIRST 100 DAYS

Consumer advocates, environmentalists, health experts and government reformers today urged Governor-elect Andrew Cuomo to use his vast executive powers to improve the lives of New Yorkers. The groups highlighted issues that they believed could be addressed by the new governor alone in his first one hundred days in office.

The issues were contained in a report, *Rebuilding New York: 30 Steps the New Governor Can Immediately Take to Rebuild Confidence in Albany*, released by the New York Public Interest Research Group (NYPIRG). The 130-page report identifies 30 areas in which the governor can use his executive powers to:

- Increase protections for financial service, cell phone, utility and health consumers;
- Establish new environmental protections, as well as measures to curb greenhouse gas emissions;
- Hold the line on health and higher education costs; and
- Reform state government. (See attached list of the thirty measures.)

Each of the sections in the NYPIRG report is endorsed by other organizations with an interest in each of the reforms.
